

Manvel Public School Mission Statement:

Manvel Public School is committed to the success of all students.

**The Manvel Public School Library
Proposed Mission and Vision Statement**

Mission

The mission of the school library program supports the philosophy for students to acquire new experiences and knowledge. It is the responsibility of the Manvel Public School Library to provide students and staff with quality resources that support the school curriculum, encourage intellectual growth, interest and knowledge that will develop literary, cultural and aesthetic appreciation of ethical standards.

Vision

To continuously strive to provide and develop educational experiences that maximize student potential and provide students with opportunities to achieve fundamental knowledge and skills that meet students' academic, social and physical needs.

Rational of proposed statements:

Our school mission statement is "*Manvel Public School is committed to the success of all students.*" The proposed mission and vision statements that I have written support this statement by expressing the responsibility of the library media center to provide students with the diverse and quality resources that will develop individual growth, interests and intellect. At this time there is not a specific library policy in place; our library is limited and I would really like to expand it to better meet student needs. With a specific policy in place, it would give initiative and support for future updates and resources that are needed. With that being said, I see the need in my proposed statements to further include more information on the technology aspect of the library.
